PROFESSIONAL SUMMARY

Senior Product and UX Designer with 8+ years of experience designing complex digital products across enterprise software, data and AI-powered platforms, financial services, public services, healthcare, and field operations.

Combines end-to-end Product Design with deep UX expertise in discovery, research, information architecture, interaction design, prototyping, usability testing, and delivery. Experienced as both a sole designer and a collaborator in multidisciplinary teams. Currently pursuing a Master of Science focused on Human-AI Interaction, ethics, semiotics, and AI literacy.

CORE SKILLS

Product & UX: Product Discovery | UX Research | Information Architecture | Interaction Design | User Flows | Prototyping | Usability Testing | Design Systems

Systems & Delivery: Complex Workflows | Data-Rich Products | Enterprise UX | Mobile, Web, and POS | Workshops | Documentation | Developer Handoff

AI & Tools: Conversational UX | Human-AI Interaction | AI Literacy | AI-Assisted Prototyping | Figma | FigJam | Miro | Google Analytics

PROFESSIONAL EXPERIENCE

Senior Product Designer

PREDACTIV | Mar 2026 - Jul 2026

- Designed conversational interfaces that let users request AI-generated audience segments through natural-language prompts.
- As the sole Product Designer across Product and Website teams, designed audience-building, onboarding, and publisher workflows; established reusable interaction patterns and delivered specifications to Engineering.

Product Designer Consultant

WORLD BANK | Oct 2025 - Feb 2026

Project partner: Ministry of Labor, Brazil

- As the sole designer, defined the information architecture and interconnected journeys for a strategic Portal Emprega Brasil prototype connecting workers, companies, educational institutions, and social workers.
- Created responsive high-fidelity interfaces and a component library, then presented the proposal after World Bank review. Brazil's Ministry of Labor approved it and took it forward for development.

Product Designer

EXED CONSULTING | May 2024 - May 2025

Client: Comgás

- As the sole designer, transformed paper-based Risk Analysis and Work Permit procedures into connected mobile and web workflows for Comgás.
- Combined field research and usability testing with conditional flows for eight high-risk scenarios, including offline completion, evidence capture, contextual data, and supervisor approval; also created the Design System.

Product Designer

ITERIS CONSULTING | Oct 2023 - Jan 2024

Client: Fiserv

- Designed implemented mobile workflows for Fiserv payment-terminal service requests, tracking, replacements, notifications, technician scheduling, and service history, working with Product and Engineering through an established Design System.

PROFESSIONAL EXPERIENCE - CONTINUED

Product Designer

WIPRO | May 2020 - Jun 2023

Selected clients: Banco Next, Rede, and Enel

- Banco Next: Designed the launched end-to-end PIX transfer flow, covering contact selection, amount, limits, scheduling, confirmation, and receipt.
- Rede: Designed an implemented Dynamic Currency Conversion experience for POS terminals and a currency-selection pattern later reused across other POS products.
- Enel: Redesigned developed operational dashboards for repair alerts, open tickets, and electrical-service requests, presenting the work to international stakeholders.

UX Designer

BRQ | Nov 2019 - May 2020

Client: Itaú

- Designed discovery-to-purchase journeys for Itaú investment products, using conversion data and workshops with Design, Engineering, and Sales to make dense financial information more approachable.

UX Designer

DOUTOR JÁ | May 2019 - Nov 2019

- As the sole UX Designer, created implemented appointment-booking flows and conducted four interviews that reframed the opportunity toward an employer-sponsored health benefit, later incorporated into the commercial pitch.

EARLIER PROFESSIONAL EXPERIENCE

Junior UX Designer | Ahazou | Jan 2019 - May 2019

Sole designer for a mobile content platform; used registration-dropout data and approximately ten interviews to redesign an onboarding flow that was implemented.

Freelance UX Designer | Canguru | Jul 2018 - Oct 2018

Redesigned a pregnancy-tracking app through personas, journey maps, user flows, prototypes, a lightweight Design System, and four interview and usability-testing sessions.

UX Designer | Simplify | Aug 2016 - Early 2017

Sole designer on an eight-person Startup Weekend team: name, logo, research, animated prototypes, and pitch for a questionnaire-based Wi-Fi access MVP that won third place. The team pursued it for eight months after the event.

INDEPENDENT PROJECT

AI Medical Residency Quiz Generator | Independent Product | Feb 2026 - Present

- Conceived, designed, and built an AI-powered MVP that generates configurable medical residency practice exams using AI-assisted development.
- Published a functional version using Supabase, Vercel, and the OpenAI API; currently refining generation reliability and content quality before broader user validation.
